TOUCH TO START

TOUCH TO START

Our classic formula based on 50 years of advanced breastmilk research

Key features:

- Supports the immune system with immunonutrients (Vitamin C&D) naturally found in breastmilk^{1,2,3}
- Nutritionally complete formula*

Key ingredients:

- Prebiotic Oligosaccharides scGOS/IcFOS (9:1)
- Postbiotics produced by Lactofidus™ process**
- Vitamin C & D

Our classic formula based on 50 years of advanced breastmilk research

Key features:

- Supports the immune system with immunonutrients (Vitamin C&D) naturally found in breastmilk^{1,2,3}
- Nutritionally complete formula*

Key ingredients

- Prebiotic Oligosaccharides scGOS/lcFOS (9:1)
 - 1. EFSA Journal. 2015;13(11):4298,9pp.
 - 2. EFSA Journal. 2015;13(7):4182,9pp.
 - **3.** Wald ER, et al. J Pediatr . 1991;118(4, pt 1):509 514.
 - * As required by legislation for follow on formula
 - ** Lactofidus is our unique fermentation with *S. thermophiles* 065 and *B breve* C50, thermally-treated after fermentation

thy diet / maternal nutrition is important when rth when babies are not breastfed. **Follow-on**

formula is suitable for infant over the age of six months, as a liquid part of a diversified diet. It is recommended that all formula milks be used on the advice of a doctor, midwife, health visitor, public health nurse, dietitian, pharmacist, or other professional responsible for maternal and child-care and the financial implications should be considered. All preparation and feeding instructions should be followed carefully as inappropriate preparation could lead to health hazards

Our formula for mixed feeding, suitable for combination with breastfeeding

Key features:

- Better Gastrointestinal (GI) tolerance^{1-5****}
- Reduces risk of infections^{6-11*,**,***}

Key ingredients:

- * Prebiotic Oligosaccharides scGOS/IcFOS (9:1)
- ** 2'-FL HMO
- *** Postbiotics produced by Lactofidus™ process*****
- **** Milk fat

For Healthcare Professionals use only. Important notice: Breastfeeding is the best for babies and a healthy diet / maternal nutrition is important when breastfeeding. A decision not to breastfeed can be difficult to reverse. Infant formula is suitable from birth when babies are not breastfeed. Follow-on formula is suitable for infant over the age of six months, as a liquid part of a diversified diet. It is recommended that all formula milks be used on the advice of a doctor, midwife, health visitor, public health nurse, dietitian, pharmacist, or other professional responsible for maternal and child-care and the financial implications should be considered. All preparation and feeding instructions should be followed carefully as inappropriate preparation could lead to health hazards.
