- Air-tight, hygienically sealed sachets

Key ingredients:

- Prebiotic Oligosaccharides scGOS/lcFOS (9:1)
- Vitamins C&D**
- DHA&ALA*(Omega-3); ARA (Omega-6)

Disclaimer: For Healthcare Professionals use only. **Important notice:** Breastfeeding is the best for babies and a healthy diet / maternal nutrition is important when breastfeeding. A decision not to breastfeed can be difficult to reverse. Infant formula is suitable from birth when babies are not breastfed. **Follow-on formula is suitable for infant over the age of six months, as a liquid part of a diversified diet.** It is recommended that all formula milks be used on the advice of a doctor, midwife, health visitor, public health nurse, dietitian, pharmacist, or other professional responsible for maternal and child-care and the financial implications should be considered. All preparation and feeding instructions should be followed carefully as inappropriate preparation could lead to health hazards. Tab image is for illustration purposes.
